

Press release

Presentation and Dissemination of the European Programme Media Literacy in the Digitalised Era (MeLDE): Supporting Teachers through a whole-school approach

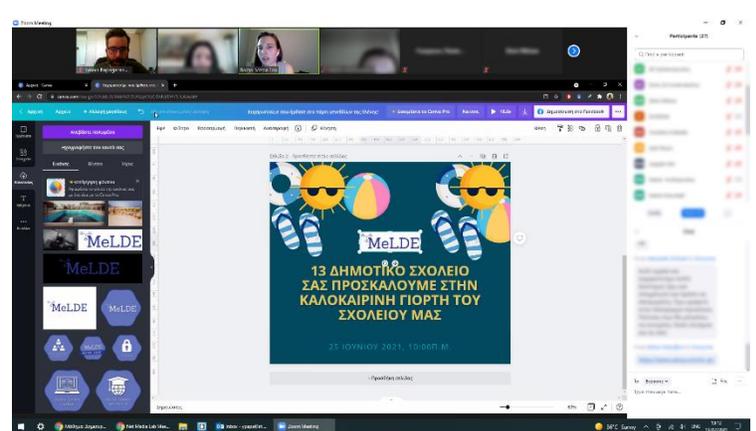

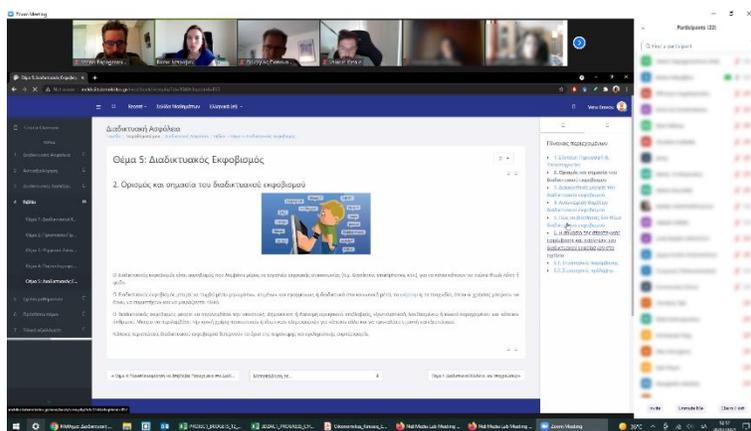

Erasmus+KA2 in School Sector 2018-1-UK01-KA201-048041

As we are successfully reaching the end of the European Erasmus+ project MeLDE- Media Literacy in the Digitalised Era: Supporting Teachers Through a Whole-School Approach, Net Media Lab organized and implemented the pilot training activities, with the aim of testing the project’s educational material and created products to a group of Secondary School teachers, and help them familiarize with the notion of media literacy and its value during the 21st century. It is considered crucial to know about digital tools for online education, online communication and collaboration, and online safety, during the COVID-19 pandemic, when most of the educational activities are being held online.

The training activities of the MeLDE project were held online and were divided into 3 sessions, the first being on 13 July, the second on 22 July, and the third on 28 July 2021, with the participation of 25 teachers in total.

During the sessions, apart from a general presentation of the MeLDE project and its products, the participants were trained on Canva, a tool for creating digital material. Also, the participants were trained on the use of the MeLDE e-Platform and its functions and they were specially taught about the material of the e-Safety module of the project.

We would like to thank everyone who took part at the training event, and for their support to the project. To stay up to date with our activities, you can visit our project’s website www.meldeproject.eu and follow us on our social media [@MELDEproject](https://www.facebook.com/MELDEproject) (Facebook), [@MELDEproject](https://www.instagram.com/MELDEproject) (Instagram). Stay tuned!
